Legende

Helvetic Nappes

wH	Wildhorn Nappe
aH	Axen Nappe
gH	Gellihorn Nappe
inH	Infrahelvetic Complex
dH	Doldenhorn Nappe
nheI	Northhelvetic Flysch

Aar Massif

Autochthon-Paraautochthon cover

teA	Cenozoic sediments
crA	Cretaceous sediments
juA	Jurassic sediments
trA	Triassic sediments
poA	Carboniferous/Permian sediments
w	Regolite

Late to post Variscan sedimentary and volcanic rocks

grap	Graphitic gneiss
rhy	minor acid volcanic and subvolcanic rocks including andesite

Maderanerl Group (northern suite)

wend	Wendenjoch Fm
wiga	Windgällen Fm
wigaP	Windgällen rhyolite
trit	Trift Fm
farn	Färnigen Fm
main	Intschi Fm
bigr	Bifertengräatl Fm

Maderanerl Group (southern suite)

die	Diechtergletscher Fm
tsch	Tscharren Fm
luda	Val Lumpega Fm

Variscan Plutons

Undated bodies

Gr	Granitoid, undifferentiated
enGr	Engi Granite
gastGr	Gastern Granite
mitGr	Mittagflue Granite
zaaGr	Central Aar Granite
grGr	Grimsel Granodiorite
sweaGr	Southwestern Aar Granite
buGr	Bugnei Granodiorite

Brunnatal Group (Plutonic rocks of Pennsylvinan age; 300-310 Ma)

brGr	Brunni Granite
dusD	Düssi-Fruttkost Diorite
mdGr	Munt Dado Granite
rusD	Russein Diorite
vorGr	Voralp Granite

Rötifirn Group (Plutonic rocks of Visean age; 345-326 Ma)

puGr	Puneggias Granite
toGr	Tödi Granite Suite
seaGr	Southeastern Aar Granite
baGr	Baltschieder Granodiorite
giS	Giuv Syenite
tgM	Tgietschen Monzodiorite
brs	Bristenstock Hbl-Syenite

Early to Middle Variscan sedimentary and volcanioclastic rocks

Cavadiras Group

gle	Val Gliems Fm
bif	Bifertenfim Fm

Pre-Variscan Basement

Innertkirchen-Lauterbrunnen Zone

iB	Innertkirchen-Kristallin: Migmatic (cdt-migmatite) granitic and metasedimentary gneiss, amphibolite, calc-silicate rocks and marbles
piB	Hick Fm: Metasedimentary gneiss (Jungfrau area)

Erstfelder Zone

erB	Erstfeldergneis: Granitic gneiss, migmatite metasedimentary gneiss, amphibolite, marbles, calc-silicate and ultramafic rocks
-----	--

Felden-Hüfi Zone

gtB	Guttannen Fm: Strongly retrograde altered and deformed metasedimentary and granitic gneiss frequently migmatitic, amphibolite, calc-silicate and ultramafic rocks
ogtB	Tschingel Fm: Granitic gneiss (Val Russein area)
loB	Lötschental Fm: Leucocratic mu-gneiss, chl-schist, migmatic bio-gneiss, amphibolite and ultramafic rocks

Sustenhorn Zone

osB	Ofenhorn-Stampfhorn Fm
-----	------------------------

Oberaar-Furka Zone

grB	Grimsel Fm: Mylonitic granitic and metasedimentary gneiss and volcanic to volcanioclastic rocks
-----	---

Ausserberg-Avat Zone

soB	Granitic gneiss
spB	Metasedimentary gneiss
smB	Migmatite

Clavaniev Zone

cz	Mylonite originated from granitic and metasedimentary rocks and fault-gauges
----	--

Tavetsch Nappe

pTN	Metasedimentary gneiss, schists, phyllite, amphibolite and ultramafic rocks
mTN	Migmatite

Urseren-Garvera Zone

jUG	Undifferentiated Jurassic metasedimentary rocks
ljUG	Liassic metasedimentary rocks
trUG	Triassic metasedimentary rocks
pUG	Permocarboniferous metasedimentary rocks

Gotthard Nappe

Variscan Plutons

lavZ	Lavaz Group
gaGN	Gamsboden Granite
meGN	Medels Granite
crGN	Cristallina Granodiorite

Pre-variscan basement

cadZ	Cadlimo Group
sGN	Granitic gneiss (Strengengneiss and similar)
palZ	Nalps Group
pGN	Metasedimentary gneiss
curZ	Curmera Group
mGN	Migmatite

Termen-Nufenen Zone

zTN	Undifferentiated metasedimentary rocks
jTN	Jurassic metasedimentary rocks
tTN	Triassic metasedimentary rocks

Lebendun Nappe

leN	Metasedimentary gneiss
-----	------------------------

Monte Leone Nappe

ross	Rosswald Series
miN	Basement rocks

Pizzo del Vallone Nappe

piN	Mesozoic metabasaltic and metasedimentary rocks
-----	---

Camosci Zone

caZ	Triassic metasedimentary rocks
-----	--------------------------------

Sion-Courmayeur Zone

zsc	Marble and calc-schists (Cretaceous)
-----	--------------------------------------

Houillère Zone

houZ	Clastic metasedimentary rocks
------	-------------------------------

Hierarchie der Einheiten

Beispiel: “Pre-Variscan basement”

Helvetic Nappes	
wN	Wildhorn Nappe
ahN	Axen Nappe
gN	Gellihorn Nappe
ihN	Infrahelvetic Complex
dhN	Doldenhorn Nappe
nhN	Northhelvetic Flysch

Aar Massif	
Autochthon-Paraautochthon cover	
caN	Cenozoic sediments
crA	Crataeceans sediments
juA	Jurassic sediments
trA	Triassic sediments
cbN	Carboniferous/Permian sediments
reg	Regolith

Late to post Variscan sedimentary and volcanic rocks	
grg	Graphitic gneiss
mag	minor acid volcanic and subvolcanic rocks including andesite
WdN	Maderanertal Group (northern suite)
WdF	Wendenjoch Fm
WdG	Windgällen Fm
WdH	Windgällen hydrite
TrF	Trift Fm
FmF	Färnigen Fm
IntF	Intschi Fm
BfF	Bifertengräti Fm
WdS	Maderanertal Group (southern suite)
Die	Diechergletscher Fm
TscF	Tscharren Fm
VlF	Val Lumpenna Fm

Variscan Plutons	
Gr	Undated bodies
Gr	Granitoid, undifferentiated
Eng	Engi Granite
Gö	Göschenen Group (Plutonic rocks of Aesselen age; 294-299 Ma)
Gst	Gastern Granite
Mit	Mittagflue Granite
CaA	Central Aar Granite
GrG	Grimsel Granodiorite
SouA	Southwestern Aar Granite
BugG	Bugnei Granodiorite

Hierarchie der Einheiten

Tect. unit 1	Supergroup	Group	Formation
Aar- massif	Pre variscan basement	Erstfelder Zone	Erstfelder Gneis
Aar- massif	Late-post Variscan volcanic and sedimentary rocks	Maderanertal Group	Trift Formation
.....			

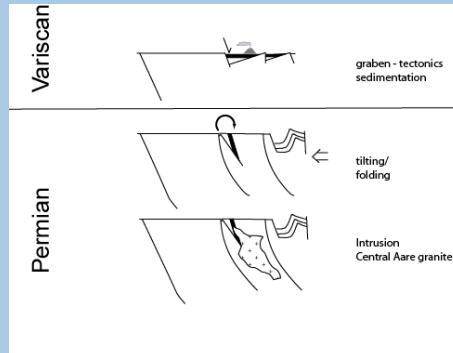

Ausblick:

- Kartenprojekt beenden
=> Gotthard-Decke soll auch integriert werden.
- Profile konstruieren: (1) km-scale; (2) lithospheric scale
- Erläuterungen zu den neu gewonnenen Erkenntnissen
- Karte der veröffentlichten (Druck 1: 100'000, digital?)

Anwendungen:

- Gliederung der Geologie
- Bessere Rekonstruktion der geologischen geschichte:

Zum Beispiel Entwicklung der Madernertal Gruppe:

- Verknüpfung der Karte mit rezenten geologischen Prozessen (Erdbeben, Naturgefahren)
- Hilfe für andere Projekte, i. B.: NFP70
