

SAPHYR

Swiss Atlas of Physical Properties of Rock

Progress Report
2013

SAPHYR Project

Compilation of all existing data on physical properties of rocks present in the Swiss Alps (not restricted to the borders of CH).

Digitization of the data using a geographical frame (GIS)

Measurements on rock samples from regions with low coverage

Physical properties

- ★ 1) Density and porosity ✓
- ★ 2) Seismic properties and their anisotropy
- 3) Magnetic properties and their anisotropy
- ★ 4) Thermal properties
- ★ 5) Gamma radiation, heat production
- ★ 6) Permeability
- 7) Electrical properties

Working Strategy

- Aim:
 - representative and complete physical properties for all rock types
- First step:
 - literature values whenever possible
- Second step:
 - measure new/update literature values where necessary

2012- 2013

2013

Working Team 2013

Dr. Alba Zappone

Coordination

30%

Michaela Erni

Master in Geology, ETH
Lab measurements & GIS

70%

from June 1st 2013

Dr. Nicola Tisato

Post Doc
Mechanical and electronic systems designer

20%

from May 1st 2013

Plan 2013

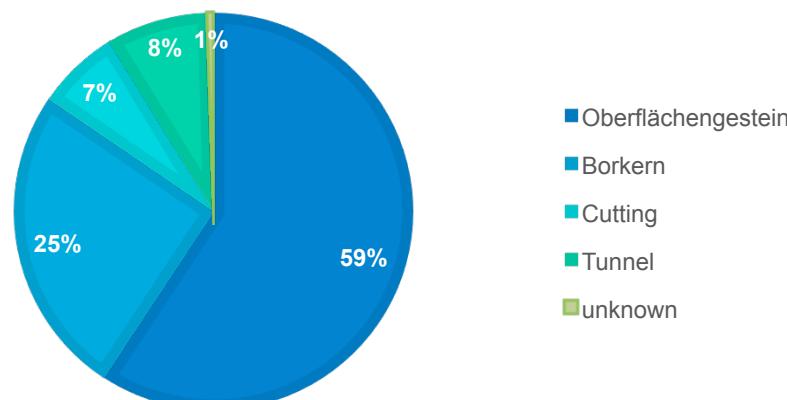

- 2012 produce new data, especially Vp & Vs from rock types and/or locations poorly represented in statistics and final map

- 2013 Update all available data collected over the years
 Add more information details
 Enhance quality of the datapoints: check for errors & uncertainties
 Search for more literature data

DISTRIBUTION OF SAMPLE POINTS

2012: 1067 tot. data points
 2013: 3073 tot. data points ⁶

Results 2013

physical parameters in database 2012 vs. 2013

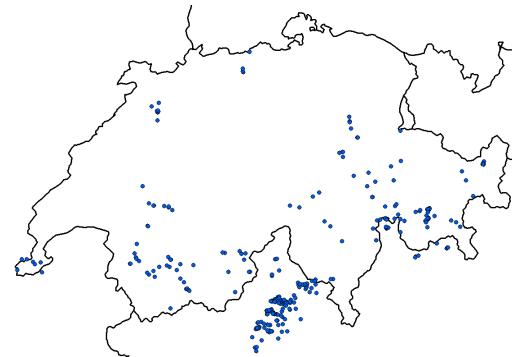

The new database contains more information about a sample:

(2012) Rock type → (2013) rock type, sample details, location, type of outcrop, geologic & tectonic information

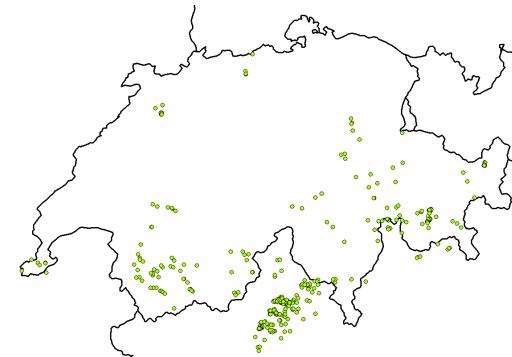

The new database is more specific and therefore more precise:

(2012) Density → (2013) grain density & bulk density

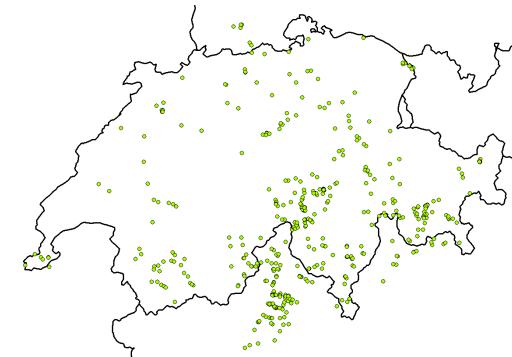

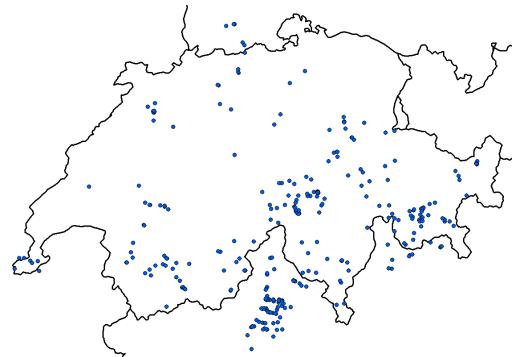

2012

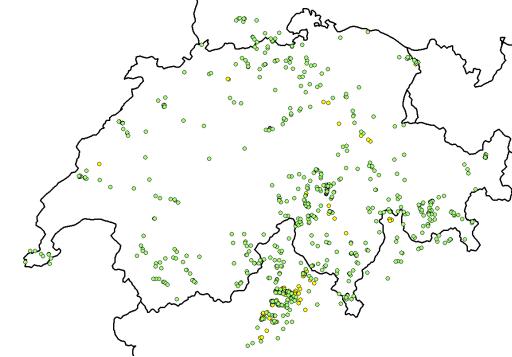

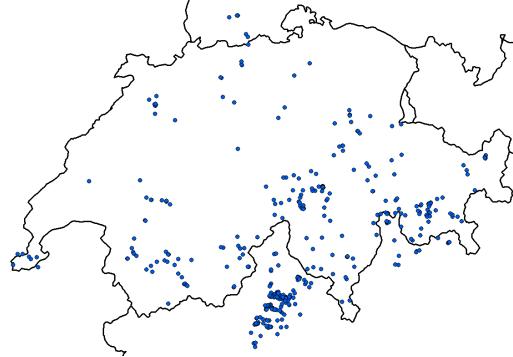

2013

$Vp0$

porosity

density

More work done in 2013

- Continuous updating of the ultrasound velocity Rig
- Implementation of velocity measurement system in the permeability rig
- Attenuation module
(Nicola Tisato)
→ Example picture

Continuous implementation in the software of data processing
(Claudio Madonna)
→ Example picture

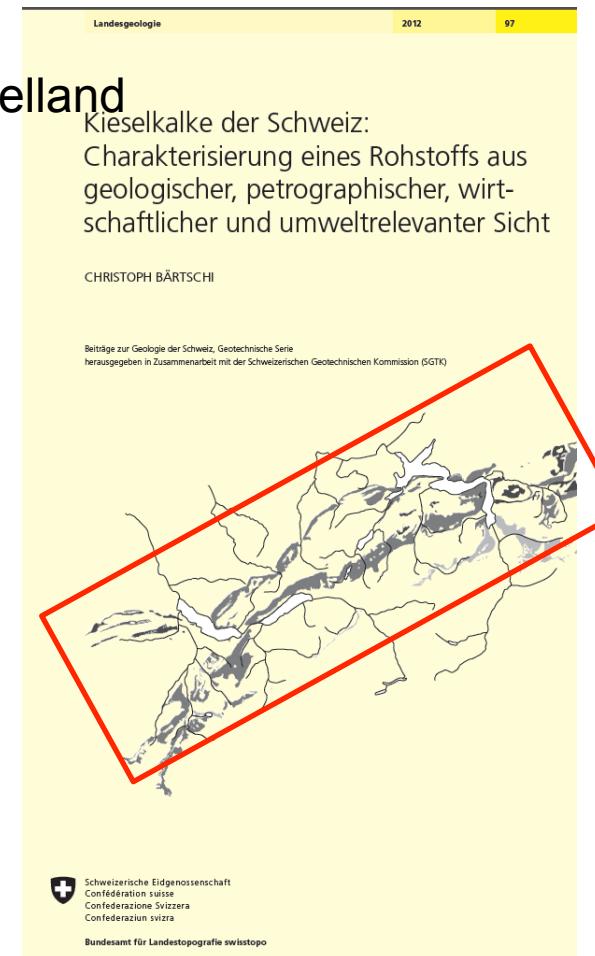

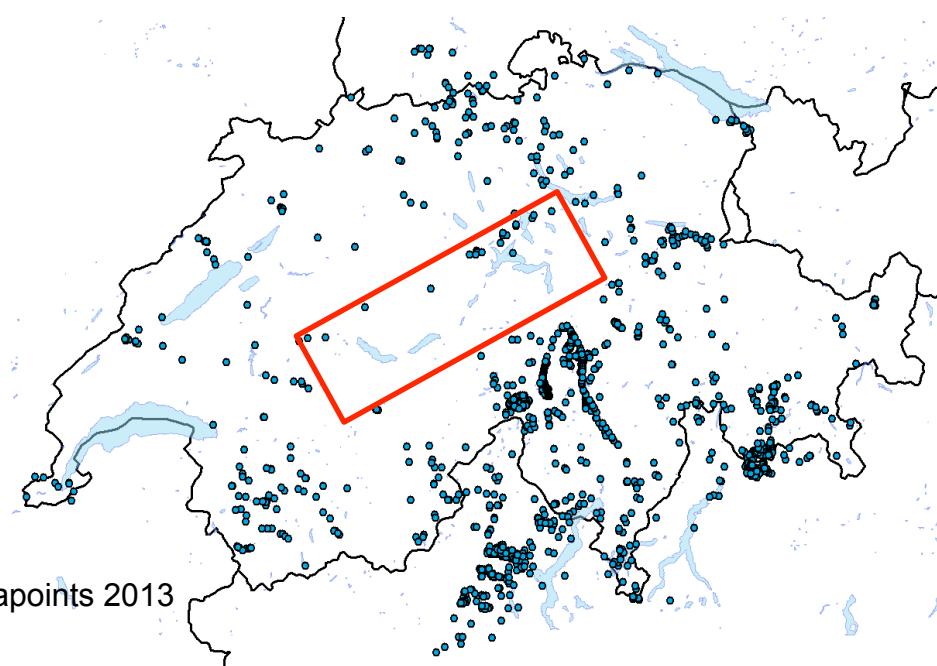

Plan for 2014

New measurements on the kieselkalke, mainly in the Mittelland

Number of kieselkalke in database at the moment <10

Bärtschi/ offer us all samples to do more measurements

Description, coordinates already done

Outreach

2012 ✓

European Geoscience Union, Vienna, April 2011

- Oral presentation: «The Swiss Atlas of Physical Properties of Rocks (SAPHYR): progress and developments»

- Annual report

- Paper on Swiss Journal of Geosciences

in submission to Swiss Journal Geosciences

- SGPK web- page

ready to hand in

2013

Zappone A., Brunjin R, (2013) Density map & VP_0 velocity map in: "Geologie Schweiz – das Wissen aus dem Untergrund" Beres M. Ed Swisstopo , Bern, 132pp

- Annual report
